

Classes

1. In `UseStudent`, what does the line `Student ksg = new Student();` do? What is `Student`?
2. In `Student`, there are four variables declared at the top of the code, outside any methods. What is the scope of these variables?
3. In `Student`, what do the methods `setName()` and `setYear()` do?
4. In `Student`, what do the methods `getLast()`, `getFirst()`, `getName()`, and `getYear()` do?
5. Why do we need these `get` and `set` methods? What does the word `private` mean in front of the variable declarations at the top of `Student`?
6. What does `UseStudent` do?
