

```
public class Ex1 {  
  
    public static void main(String [] args) {  
        int i = 3;  
        int j = Integer.parseInt(args[0]);  
        System.out.println(i + j);  
    }  
  
}
```

```
public class Ex2 {  
  
    public static void main(String [] args) {  
        while(true) {  
            // loop forever  
        }  
    }  
  
}
```

```
public class Ex3 {  
  
    public static void main(String [] args) {  
        String s = args[0];  
  
        if(Halter.halt(Ex3, s)) {  
            while(true) {  
                // loop forever  
            }  
        }  
        else {  
            System.out.println("done");  
        }  
    }  
  
}
```
